At some point you guys should really have a group meeting, so we can gather all of our current knowledge together. With all the time travel and different perspective's on events, it's important to get our facts straight. We need to think about everything that's happened, how it occurred, and why.

So, we have a powerful dimensional rift, a high power princess, an advanced android, and Torin's TARDIS as our main tools. We need to use these tools to cure The Doctor, and then stop Discord.

We'd have enough energy to pinpoint the core Discord, and possibly even restrain him long enough to activate the Elements of Harmony against him. After that, I can take care of the rest.

Anonymous asked:
So what's the plan? Do we wait until Twilight is back and can summon the Doctor to convince him to eat this pear? Sounds way too easy, be careful you guys.
And how are we going to go about curing the Doctor? What should we do with the magic fruit?

I believe the fruit would be best used after the curse has been lifted. He lost his love before the curse, and getting it back while cursed could corrupt it. I think first, Torin needs to talk to him and prepare him to confront the rest of us. Torin knows him more than any of us.
I'll be able to bring him here so that sounds best.

Then... I think Derpy needs to talk to him. But we'll all be there so he can't hurt her. We can restrain him if we have to, as long as Derpy can say what she needs to say. I'm almost certain Derpy is at the root of the curse, which is why The Doctor reacts so strongly to her.

I've gone over it so many times in my head, just what I'd say if I had the chance... I don't think it's anywhere near perfect, but if I need to do it soon, I'll do my best.

Once you've done that, I will cast a group memory spell so the Doctor can have the memories of all the points in his lives come together.

I have a good feeling all of the elements save for one are in this room. Once we have the Doctor, we use the elements against Discord.

screamtech-inc asked:
Wait, if Discord leaves no trace where he currently is in time and space, what if we search areas that don't have any traces of him? Like how astronomers would look for the lack of light in areas of space to try to figure where black holes were?

Good idea. I'll get to work finding the negative space that Discord occupies so we can get a head start.

If I'm connected to the rift, I can see everything.

I've adjusted the settings so you should be able to connect to the NFT safely. Just be careful, having access to that much information could overload your system. Take it a little at a time.
Alright, I won't push it too hard and if it gets to be too much I will disconnect and try again later.

Er, do you want me to-
I'll plug myself in, thank you. Bit of a private thing...

Alright, well, I'll be on standby to make sure everything goes smoothly.
Right-o.

It's been quite some time since he plugged in. Is everything going alright?
He's been navigating carefully, he just locked onto an anomaly and has been pursuing it.

Discord prime located, locking on to the signal. Activate the trapping sequence.

Lock secure. Activating trapping sequence.

Target is fighting the lock? Enhancing the hold? I think just a little more and we'll have him held long enough to do what we need to do?

Almost... almost, we're
so close, just a little more!

Heh. Got him. We just bought us some time, so we'd better use it wisely.

Is it awkward between you and George ever since the incident back then before you were discorded?

George has more or less moved on from our fling... The awkwardness mostly comes from me not tending to him as much as I used to. I've been neglecting everything. I explained it to him and he understands, but he's still a bit disappointed in me.

Do you th nk Di would allow you to help fix your Tardis? Or, at the very least, ask Di s opinion on how best to go about treating her like a queen. Is there any pampering you can do for her while she s in rest mode? Would she like a letter of some kind apologizing?
Di has been teaching me how to use the controls properly. I've never been good at reading the manual but a hands on approach is proving useful. She's a tough teacher though. A real hard-ass if I'm honest.

the-tiktok-rogue asked:
he may have done what he did but The master is still doing good, without witness, without hope, without reward, good is good, what are you going to do, Doctor?
I'm going to remain skeptical. I have no idea what his new life is like, I can't just go by Di's words to judge his character.

You did warn him, so that part his fault. Besides, the sooner you two finish this problem, the sooner you two don t have to see each other anymore. And the sooner you don t have to see h s avatar anymore.

Yeah I shouldn't be to blame for him doing something stupid that I warned him against. I hope he thinks it was worth it, otherwise what a waste.

I don't think banging the Master or you over the head with the mistakes made in the past really helps anyone. It doesn't make the victims feel better and it's not particularly productive for the two of you

But what's going to make me hesitate on making more mistakes other than hitting me over the head with the mistakes I've made?

reggiebunny asked:
Have you considered that maybe The Master is being good because you're being bad? and before he was being bad because you were being good? Perhaps the way things are right now are for the best. You're not as dangerous as the master and the master is actually better at being good than you are
I don't think so. From what I've learned, he switched sides before he ever knew I was here. Of course, he did a lot of terrible things before reaching this point of goodness. And those wrongs that he committed are clearly biting him in the ass.

Anonymous asked
Doctor, it seems that you and the Master have finally met in the middle, morally speaking. Maybe that means you understand each other better now than ever before. He finally understands the love you've always had for the universe, and you now truly understand the madness he's always lived with
Yes, that's... that's true. We do probably understand one another better... Though I'm not sure it's entirely a good thing.

No, it's not like you did anything significant to me in this life.
Aside from saving your arse from a serial killer but you were probably too far up in Looloo Land to remember.

So why are you risking seeing

Because, Dot. It's time. It's time we fix this mess for good.

I care so much about You Doctor. I care so much that when I saw You struggling to be Yourself, I tried to fight it, thinking it was what was best for You. But I was wrong, and I'm so sorry for that. But that doesn't mean I deserved to be treated the way I was.

I don't think I was wrong for taking time to myself, but it was wrong of me to say those horrible things to you. I was so upset and didn't know what was going on, so I just lashed out and let my feelings get the best of me.

But I'm here now. I promise
I'm here for You, and I will fight for
You just as much as You once fought
for me. You kept me safe in the past.
You saved me from an almost meaningless

None of you can help me. I can't let this go.

That's not true, we know the memory spell worked for you for a time. The only problem was those memories weren't involved with your recent life.

Now, we have Torin who has known you almost all your lives. NeoSurgeon who has your actual memories. Jack who is more familiar with your more recent lives, and finally Derpy who knew you in THIS life before the curse.

I think with all of these memories combined, we can finally break you free of the curse. So what do you say? Will you let us help?

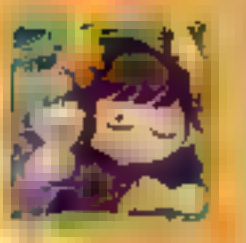
And who is the Doctor if not someone who regularly defies the circumstances of fate?



darkraimaster12 asked:
There's one miscalculation in the plan, Discord. The Doctor doesn't need to be his name, because it's not a name. It's not a title; Doctor, on it's own, is meaningless. Many of us still haven't learned much about his humanoid counterpart, he's the only splintered version of himself we care about. We said we'd be here for him, and we meant HIM, the little pony in front of us

Discord it's time you learned the singular truth that so many others before you learned the hard way too. It doesn't matter if you're a warring alien race, sentient plastic, a god, human, or anything else, if you stand to make the lives of others worse, especially if they die or if it's just for your own benefit, then you'd best be ready to get kicked to the curb by The Doctor and his companions.
You may think you've won but I won't go down without making you pay a price

But why pay

Anonymous asked:
Have you ever considered that the only way to truly end all of this is to accept the madness and the drums back into your heart? To become the same madman you once were and undo all of your progress you've made as a person?
Life's not fair. Only death is.
Before I die, there is something I want to tell you. Patience and I... we have a daughter out there. DI knows where she is. I mixed a little bit of Pinkie Pie in with her when I loomed her, to represent both loves I had.

Protect our legacy, hers and mine. I'm not asking you to become the Doctor, you're not ready for that level of responsibility, but go out and be something great, my old new friend.

It's it over?
.. where's Torin?

Anonymous asked
RIP Torin
The Mane— Torin absorbed Discord Prime and had to die with him in order to truly stop him. Discord is defeated but this isn't quite over yet.

Anonymous asked
How are you going to reset the Prime Universe? Also, do you think that Discord would allow you to do that? Even if you reset some of the universes, either him, another Discord just like him, or the Discord that the other Discords come from, will mess with the other universes.

Without Prime Discord's influence, the remaining fractions are much weaker. They aren't harmless, though, so I need to figure out how to contain them within their own universes, at least the ones that can be altered.

Anonymous asked:
Discord's influence on other universes is a fixed point in time. Meaning, some universes were destined to be messed with by him. How are you going to fix that?

I can't fix everything, but I can fix this universe and those branching from it. I think Discord needs some kind of anchor to ground him, it's possible that the fractions remaining can be reformed to be chaotic good at best.

Anonymous asked
Wouldn't that mean that the universes with their own Discords will be unaffected as well, seeing as how those universes need a Discord in order for certain future events to happen?

Discord's influence has easily been embedded into the many universes he's accessed, but that doesn't mean they're all doomed to destruction. I think as long as the elements can be involved, he can be managed.

Maybe I can do something about it...

Not alone, you can't. Which brings me to the next thing— Twilight. It's time to fix your timeline.

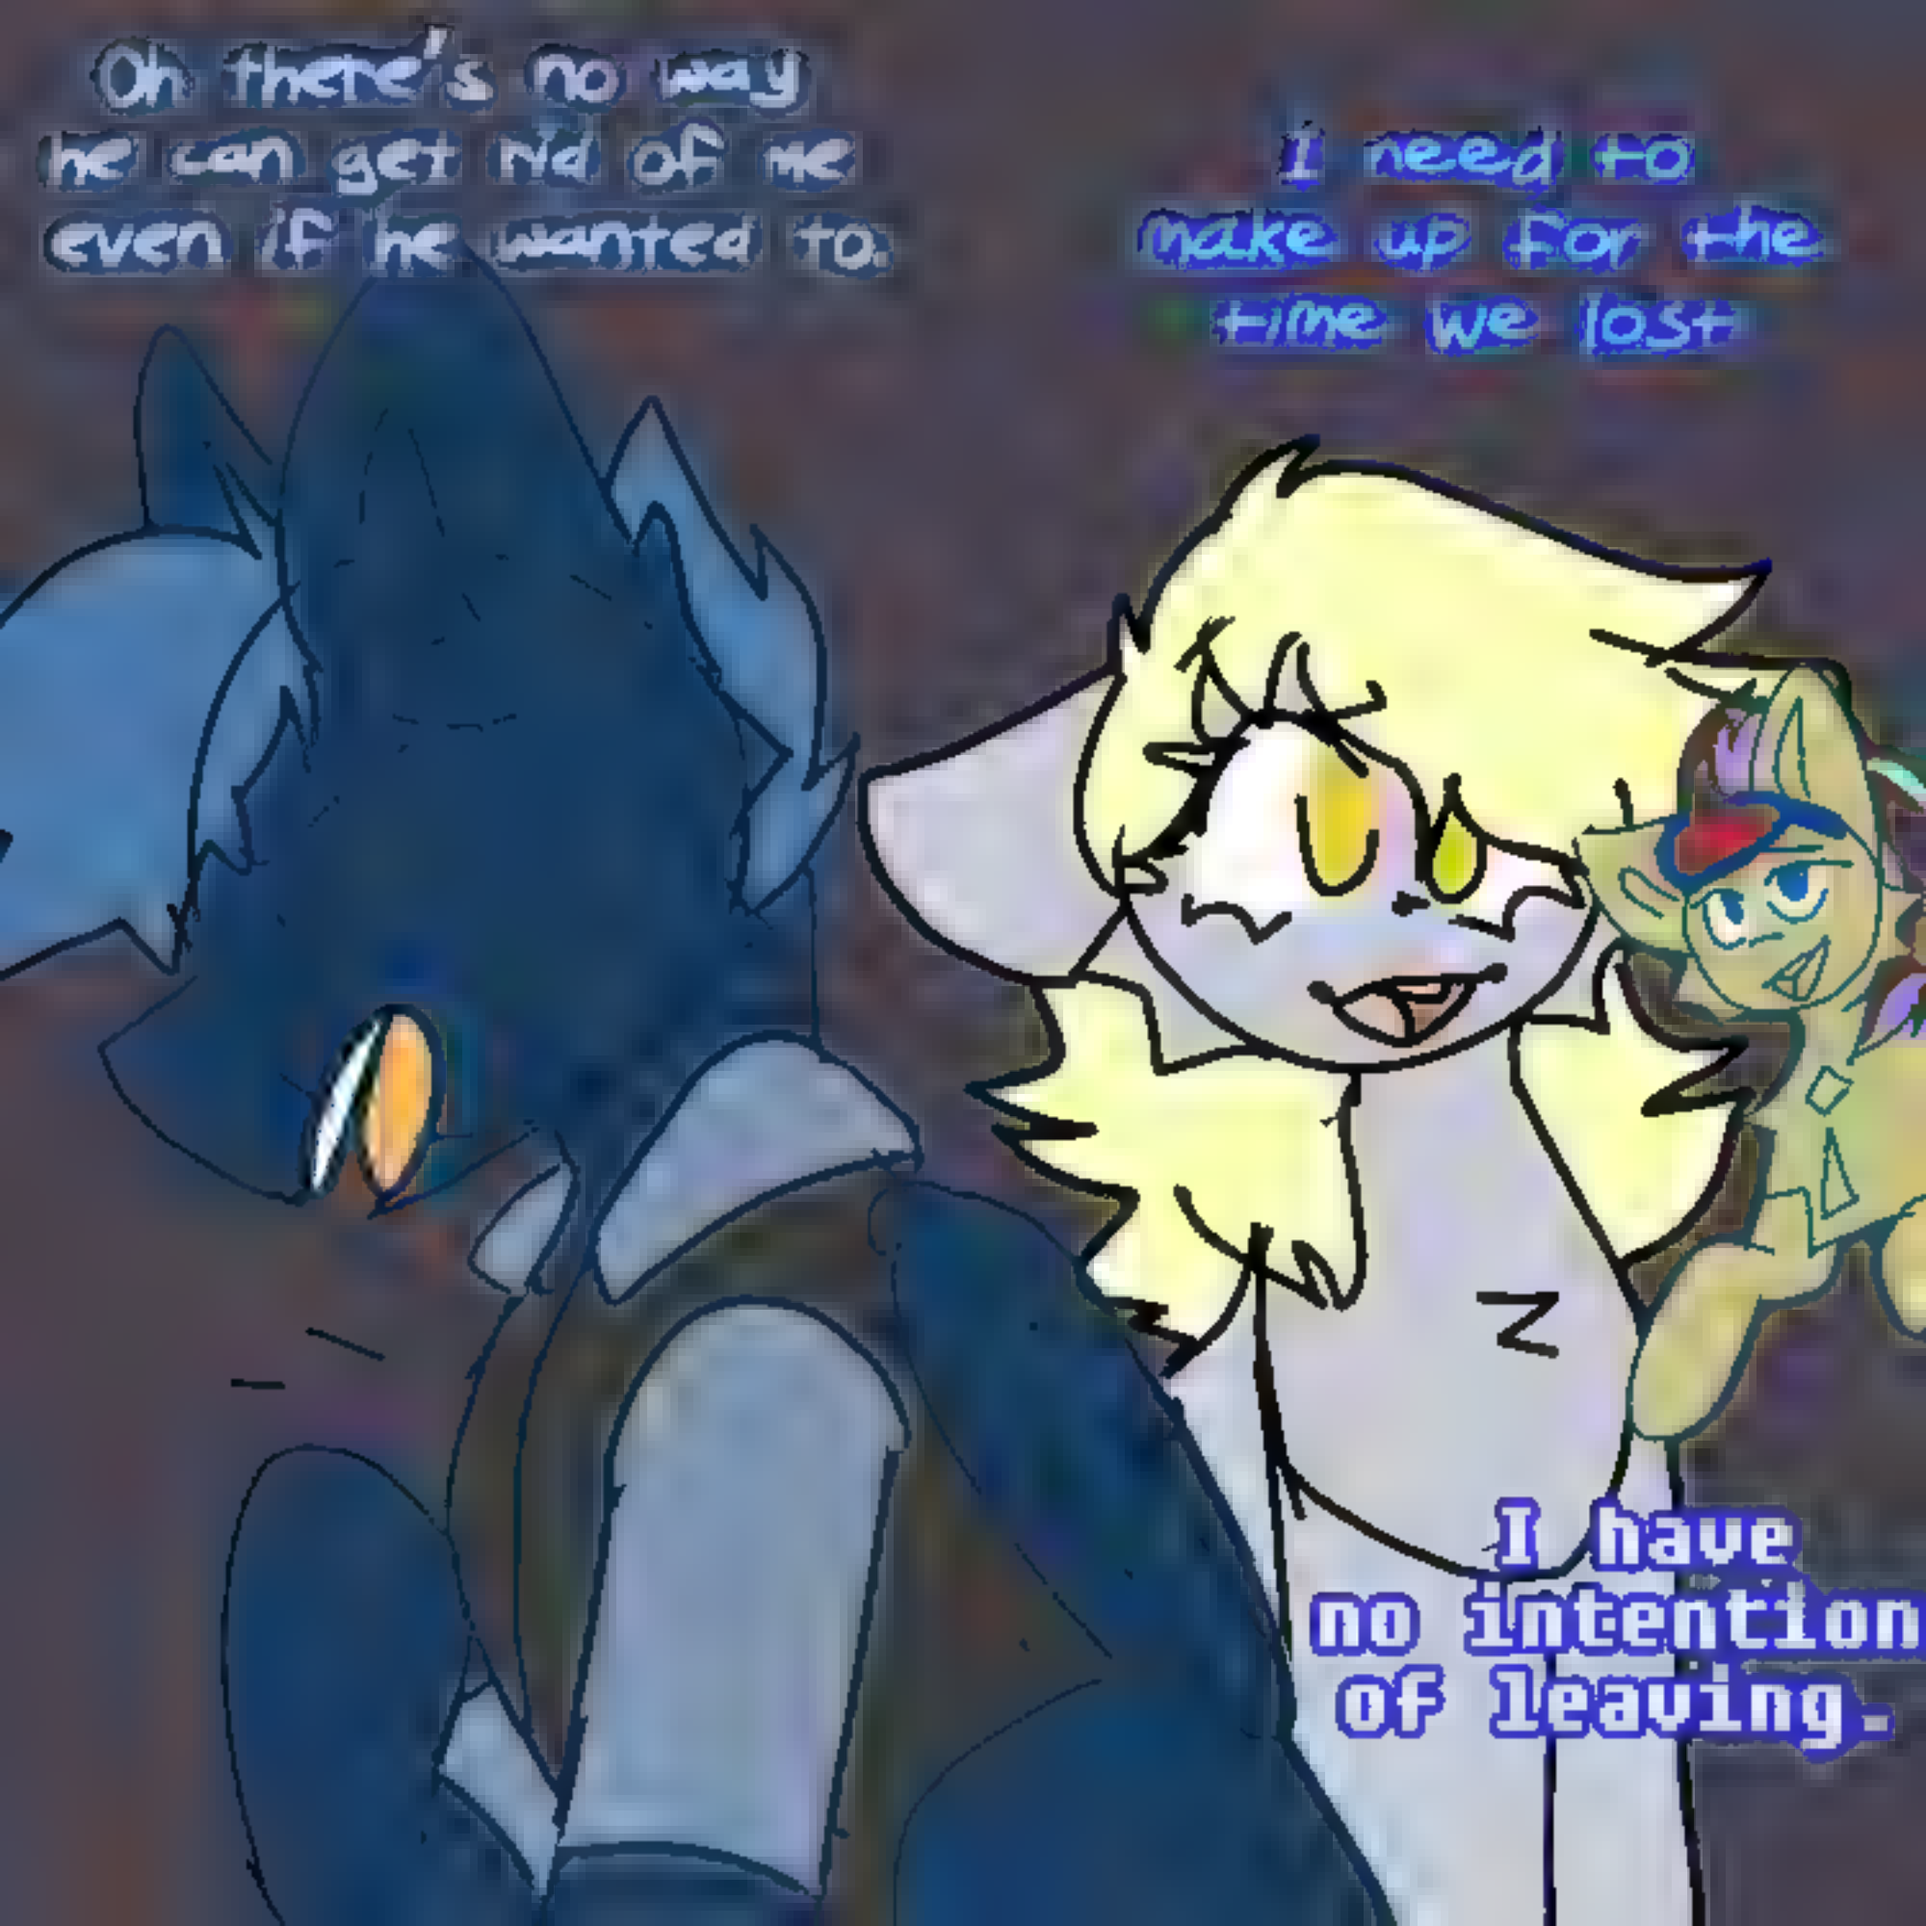
S-sh...
So you mean, after this, I won't—?

You won't remember this horrible reality. You'll be with your friends again, you'll be rightfully in your place as the Princess of Friendship.
I... I almost can't believe this is happening... Are you going to be alright?
Not at first, but I'll manage.

So are things really going to go back to normal?
That's right Spike None of this awful stuff with Pinkie Pie and my friends will be a reality any more

I just want all of you to know...
Your friendship meant everything to me. I didn't think I could share a special bond like that after everything, but you proved me wrong.

Jack, Derpy, Neo... Promise me that after all of this, you'll be there for The Doctor.



Oh there's no way he can get rid of me even if he wanted to.
I need to make up for the time we lost
I have no intention of leaving.

... I'll miss you, Twilight...
But I'm happy for you.
You deserve a good life
and you deserve to have
your friends by your side.

I'll miss you too, Derpy,
but I'm confident you're a strong

What about Torchwood? After all, if the past is changed, then those who joined Torchwood would have never joined in the first place
Yes, those who joined Torchwood will have never joined. Time will rewrite itself, and Jack will be the only member who remembers unless you count Darryl and the girls.

This won't undo the timeline Jack and I experienced, it just replaces it. So for us, it's as if we stepped from one timeline into another. That's why even if Torchwood was never founded, we still keep the memory and experience of it.

Anonymous asked:
Doctor, once the past is altered, won't some events have still happened anyway? For instance, Twilight meeting and raising Lightning Blitz for a while? You meeting Scootaloo and Lightning Blitz still happened, but what would happen instead if it didn't for Twilight?
Because Lightning Blitz was from a different reality, his reality is unaffected. His reality had its own time issues to deal with as well. He was still taken care of by the old timeline Twilight Sparkle, there's just no way to access her any more.

foodielovethealicorn asked
Doc, once the past is changed, what's to stop Trixie from obtaining the Alicorn Amulet again and taking over the Diamond Dog kingdom just like in this future? I mean, it may or may not happen, even if Trixie's back on her intended future path
The only reason she obtained the amulet was because of The Vineyard and Octavia, and the only reason she became the Queen of the Diamond Dogs was because of Discord's influence.
Neither of these things occur in the fixed timeline.

Even Octavia should be alive again, without any memory of experience of me or The Valkyrie. I wonder what she's going to do with herself now.

busterwarrior2099 asked
Well now since twilight timeline is restored doesn't that mean every event that happened in that timeline will cease to exist? Including warden death?

They're right. I can't begin to describe how guilty I already feel right now. How heavy my hearts are. I think I need time to process before I open the floodgates. As I am now, I don't think my hearts could take it.

puzzlingfrost asked:
So who's gonna break the news to Celestia and Luna that their father is dead?

I had to tell the Princesses what happened to the Master. To be as old as they are, knowing him as long as they did, it was a heavy blow for them. I wish I didn't have to be the one to tell them, but it was my responsibility.

I also put in a fail-safe for Discord, suggesting to the Princesses that he be reformed by one of the Elements of Harmony. Teach him to be kind, to value Friendship. This should set off a chain reaction through the multiple universes, reforming many of the remaining fragments, making them harmless

purpiolart asked:
Say Doc, or maybe its better to call you Time Turner from now on, maybe it's best that you take time to recuperate in Ponyville. You've been suffering for so long, and you should focus on taking time to heal. And who knows, maybe a new adventure is waiting for you there

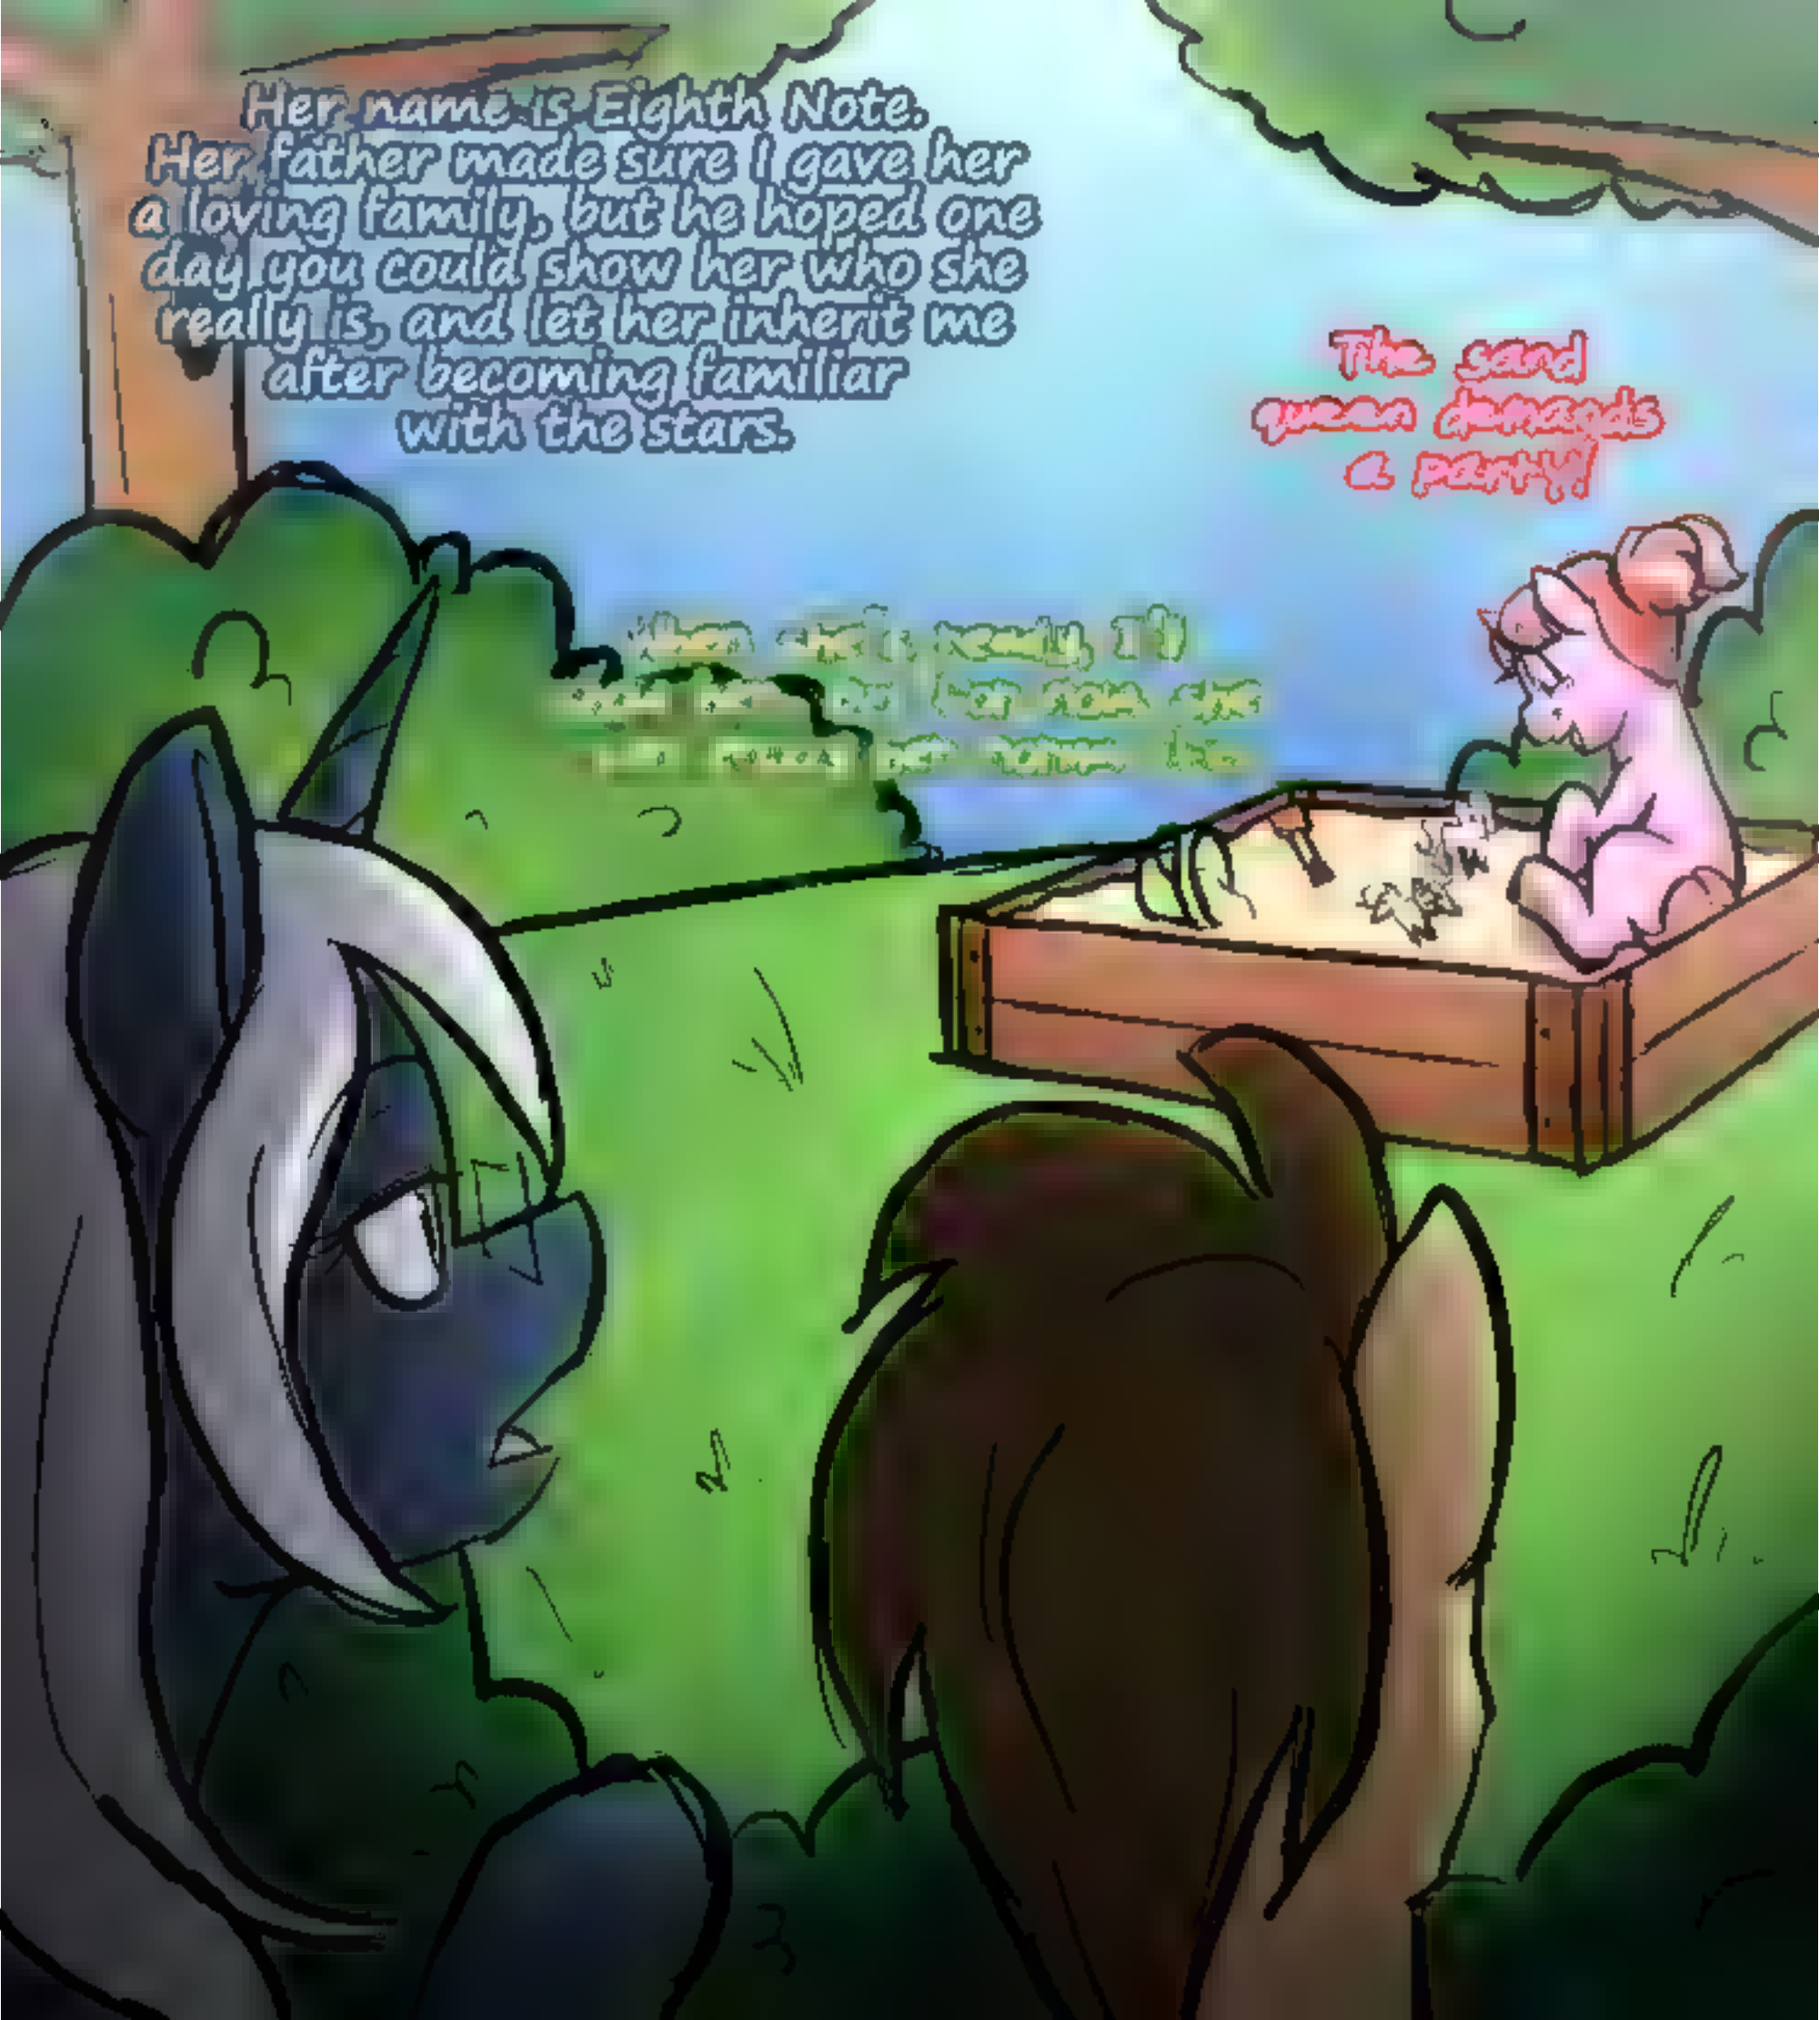
Jack should be happy to know Lyra is alive and well now. He told me about her murder and how hard it was for him to react properly to it due to his curse.

Trixie has come a long way from her arrogance and spite. With a good friend who she could relate to, she found actual value in herself so that her insecurities no longer dictate her actions.

Octavia originally had a feud with Vinyl Scratch ever since Vinyl performed for the royal wedding. But after she got to know Vinyl better, she finally found someone who let her chase the thrills she always wanted.

It's hard to describe the feelings I feel when I see Twilight Sparkle thriving with her friends. It warms my heart, but that warmth turns into a burning in my chest. I miss her, but I know better than to interfere with her life. She's much too important to the timeline to meddle with, and the Elements of Harmony are back where they belong.

I was wondering when you'd have the strength to come to me.



Her name is Eighth Note. Her father made sure I gave her a loving family, but he hoped one day you could show her who she really is, and let her inherit me after becoming familiar with the stars.

I've asked you all here because... I don't know how else I can apologize or make it up to any of you for the things I've done.

It wasn't your fau—
Don't say that. It doesn't matter if it wasn't my fault, I still need to take responsibility for the pain I've caused and if I just shrugged it off as 'not my fault' I don't feel anyone will find closure.

I don't know how to say these things,
so I spent a lot of time writing letters over and over
and over trying to reconcile and I have the best I could
manage here for all of you. So if you could read
my letters I'd appreciate it.

NeoSurgeon, I unwittingly brought you into this world and you learned to value life. And I betrayed that value by tricking you into being a part of someone's death. Please, don't blame yourself. You were taken advantage of, and I don't want you dwelling on it. I hope you never have to experience anything like that again. You are a living being and I respect you. You were looking out for me, and I took that for granted. I want to make it up to you by showing you the universe proper-like. I want to see your world grow and evolve into something wonderful, so I'll show you whatever it is you want to explore. Thank you for helping me.

-Doctor

Jack, I know I'm not really YOUR Doctor, but still I am sorry that he was not there for you in some of the worst of times. Your friendship means a lot to me, it's worth the headaches. You showed me so much support and I repaid you by abandoning you. I understand your anger towards me, and I will always try to make up for it for as long as you are here. Whenever you are ready to go home, I'll help you do that. I can tell something is really bothering you from your universe, so take all the time you need to recover. And please feel free to talk with me about it.

-Doctor

Dinky, Sparkler, . . . You must be so confused and hurt by everything. You've barely been in this universe and you've already been exposed to so much pain and anguish. You might feel like you don't matter to me any more, but that's far from the truth. You girls mean everything to me, and I want more than anything to heal the wounds I've inflicted on you. I hope you'll let me be there for you. I want to be a big part of your lives, but not like how I have been. I want to be a proper guardian to you both and I want to do whatever I can to make you happy.

-Doctor

Derpy, this is... the hardest letter I've ever had to write. You were my companion, my dearest friend, and I doubted you in a time of uncertainty. That doubt grew into a hideous monster that made me lash out against you in the worst of ways. Please, please know that you are worthy of love. My anger was unfair to you. The damage I've done might never go away, I am aware of this... But I hope you'll have me again, so we can mend what was broken. You mean everything to me, my dear companion. My light in the darkest night. Keep shining brightly, and never let me hurt you again. I'd sooner die than harm you.

You're good at picking up on things, Dinky. But it's not because I don't want to be noticed by the two of you. I'm just scared what it could mean for you, having ponos in the Lost DNA.

You could have normal pony lives, or you might end up finding yourself reincarnating when you die, having a new face and a new personality. You might be more sensitive to time. You could have interdimensional normal pony's. I mean you'd be perfect for that.

I really hope you're my papa...

It doesn't matter what DNA says regardless if you are blood related or not you're still his kids

Well Doc... I was in a pretty bad place before I came here. I left Earth behind after losing too many people, and I was dealing with complicated feelings regarding y- My Doctor.

I couldn't understand how he could leave the world in such a terrible state. The event was huge, it didn't seem possible for the Doctor to not know that all of Earth's children were in danger.

And I tried to take the place of The Doctor to save them, at the cost of my own family, my flesh and blood. I couldn't be like him, I wasn't him, and I did something unforgivable for the 'greater good'.

Yeah... After a while
I started to figure maybe
that's what was going on.
But I still felt like drowning
my sorrows and my spite
and my disgust with myself.
I still couldn't bring myself
to go back to the Earth
I felt I failed.

So... Do I want to go back? Sort of. But sort of not. I still don't quite feel ready to go back to Earth, that's for sure. But I think maybe, in this universe, I can start to properly heal, you know? Being far away from the things that hurt me.

So, whenever you don't need me anymore, I plan to use a small NFT I kept open in order to go to the 'Purverse' as you call it. I really liked Purr, and I'd hate to just disappear on her.

Maybe I can have a life there for a while, and then when I'm satisfied that's when I'll try to find my way home.

Ah...?

Are... Are you saying you... you know... like-liked me...?

You could put it that way, sure. But back then I was still attached to what I thought was my old life. Now though, that doesn't matter. That Doctor has his life still, it's not mine.

So what are
You saying now?

Anonymmus asked
Do you stil love her? Derpy, I mean.

Well it's... It's complicated. I... WANT to... to love you... But I'm more scared than ever to do so because of how much I hurt you...

Anonymous asked
So, Derpy after everything is fixed and the Doctor goes back to his old self, will you go back to being in love with him?

Then... why don't we just take things at their own pace, take it slow. Over time we'll see if we're more comfortable with each other, and... if you'll still have me, maybe one day we can be something more for one another.

I think I'd like that very much...

So back in "your" universe, the real Doctor has just been living their lives?

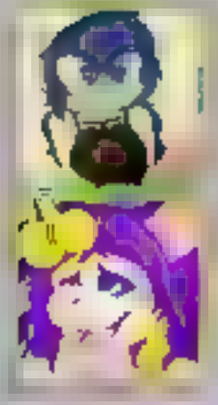
Do you th nk you ll use a d fferent console theme once your TARDIS is cool again (instead of the one you had before this), or do you think she'll go to another older theme? Because I kind of like the classic (from our perspective) consoles

fe26eagle asked:
What do you want us to call you now. Doctor? Time Turner? Do you want to uphold an old promise? Or do you want to forge a new one?



meowiemari asked
This has been quite an adventure. A long journey. You'll be okay, right Turner?

reggiebunny asked:
Are you going to be OK, Mr. Turner?

reggiebunny asked:
Doctor or.. maybe Time Turner would be better to start calling you. I understand how you feel. Guilt is.. hard, and it never truly goes away, but the best thing to do is take each day one day at a time. Don't rush anything, take it slow. There will be good days and unfortunately, there will be bad days too. It's inevitable. It's just how you cope, who you surround yourself with that matters. I'm proud of you.

madeline105060 asked:
Derpy you're a great mom and a great friend but you've been through a lot and got hurt so I gotta ask how do you keep smiling

I have hope. I know things can feel hopeless sometimes, but I've been like that before and against all the odds I was pulled out of the darkness. I have to believe that with effort, things can always have the chance to be better. And sometimes that means smiling even when the world feels like it's against you.

bronie312 asked
Doc? I may not have been there all the way to the very end as some others did, but I do wish for one th ng for you and everyone else to live happ ly ever after.
We'll do whatever it takes.

Are you happy?
And I'm hopeful with some worries but determined to obtain happiness again.

rainbowwhooves521 asked:
What will you do now Doctor? Where do you go from here?

As we promised one another, we took things one day at a time. Re-bonding, healing, learning to be happy again like learning to walk.

Derpy and I eventually got together romantically, it was hard at first but I think we managed to adapt well to a more domestic life together.

We eventually decided to get married. I let Derpy be the one to ask, as it was only fair to make that her decision.

Even still, I decided I'd take weeks to months long breaks between visits with Derpy to be by myself to just focus on me and my emotions.
BOX

This wasn't just to take breaks, but to allow myself to age with Derpy. My gaps between visits were long for me, but short for her.

Eventually, Derpy lost her eyesight, so I became her eyes for her. Never leaving her side. We managed to make a happy long life for ourselves.

And eventually... THAT day came...
I know there's not much time left for me, but I need you to make me a promise.

I have no regrets.
and I want you to do the same.
Please don't have any more regrets.
You did the best you could, and I
had a wonderful life. So
no more regrets.
No more regrets...
I promise...

I said my goodbyes to my family. I knew it was my time to go as well, though I had no idea if this would be the end or if I would regenerate.

undeadcleric asked:

The way I see it, there are two possibilities. The first is that this is your last life. No more regeneration after this point. If that is the case, you owe it to yourself to do some soul searching, make peace with yourself, your loved ones and your enemies so that you can walk away with your head held high. If there is a surprise regeneration in there, you should still do those things anyway. Give the new you a clean slate going forward.

There's a lot on my mind. I think back to everything, to how many people helped me. Not just the ponies around me, but all of you as well. Sure, there were some of you who were a detriment to my health, but most of you supported me and showed me recovery was possible. I can't begin to thank you enough for being with me in my darkest moments.

I hope this ask finds you when you need it the most Never be cruel never be cowardly Remember, hate is always foolish and love, is always wise Always try to be nice and never fail to be kind Oh and you mustn't tell anyone your name No-one would understand it anyway Except children Children can hear it. Sometimes if their hearts are in the right place and the stars are too Children can hear your name But nobody else Nobody else Ever Laugh hard Run fast Be kind

I don't know where I'll go from here, but if there's one thing I can say before I go... It's that I really and truly have no regrets any more. So thank you. And farewell.

My name is Tootsie Flute My mom and dad are Amethyst Sparkler and Comet Tail, and my auntie is Dinkie Doo I'm 14 years old, and it's been ten years since my grandparents on mom's side died.

Auntie and mom would tell me all sorts of stories about them, how they used to explore space together, how grandpa was over 500 years old when he returned to the stars. But I'm sure a lot of it was exaggeration for bedtime stories.

The last I remember of my grandpa, he told me that he wasn't sure if he would see me again, but if he did he'd have a new face
He gave me a special name that only we would know so I'd recognize him.
There were more stars than I'd ever seen, but I can't remember where
Maybe I imagined the whole thing...

I don't really know what it means, and after all this time I'm sure he died. I remember a funeral for him, and he has a tombstone next to Grandma's.

I'm working hard to study for school and keep good grades. I've always had perfect grades and I don't plan on messing it up any time soon! I'm obsessed with science, especially when it comes to flora! It's even my talent!

THUK!
What was that noise? Did a bat hit my window or something?

Who are You?!
I'm warning You, I'm gonna scream for help!

Sh sh shh! Don't be like that, Suzie! It's me!

S-Suzie..? But
that's— No way.
...
Grandpa?

superdogbiter asked:
So now what?
Correcto! You lucky sport, have I got a universe to show You!
